INDEPENDENT AUDITORS' REPORT

To the members Ayub Chaudhry Investments (Private) Limited Report on the Audit of the Financial Statements

Opinion

We have audited the annexed financial statements of Ayub Chaudhry Investments (Private) Limited (the Company), which comprise the statement of financial position as at June 30, 2020, and the statement of profit or loss, the statement of comprehensive income, the statement of changes in equity, the statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information, and we state that we have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of the audit.

In our opinion and to the best of our information and according to the explanations given to us, the statement of financial position, the statement of profit or loss, the statement of comprehensive income, the statement of changes in equity and the statement of cash flows together with the notes forming part thereof conform with the accounting and reporting standards as applicable in Pakistan and give the information required by the Companies Act, 2017 (XIX of 2017), in the manner so required and respectively give a true and fair view of the state of the Company's affairs as at June 30, 2020 and of the profit, other comprehensive income, the changes in equity and its cash flows for the year then ended.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) as applicable in Pakistan. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants as adopted by the Institute of Chartered Accountants of Pakistan (the Code) and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information Other Than The Financial Statements And Auditor's Report Thereon

Management is responsible for the other information. The other information comprises the information included in the Annual Report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be

materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Board of Directors for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting and reporting standards as applicable in Pakistan and the requirements of the Companies Act, 2017 (XIX of 2017) and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs as applicable in Pakistan will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs as applicable in Pakistan, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due
 to fraud or error, design and perform audit procedures responsive to those risks, and obtain
 audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk
 of not detecting a material misstatement resulting from fraud is higher than for one resulting
 from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations,
 or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing
 an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required

to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

 Evaluate the overall presentation, structure and content of the financial statements, including disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

Based on our audit, we further report that, in our opinion:

- a) Proper books of account have been kept by the Company as required by the Companies Act, 2017 (XIX of 2017);
- b) The statement of financial position, the statement of profit or loss, the statement of comprehensive income, the statement of changes in equity and the statement of cash flows together with the notes thereon have been drawn up in conformity with the Companies Act, 2017 (XIX of 2017) and are in agreement with the books of account and returns;
- Investments made, expenditure incurred and guarantees extended during the year were for the purpose of the Company's business;
- d) No zakat was deductible at source under the zakat and Ushr Ordinance, 1980 (XVIII of 1980); and
- e) The Company was in compliance with the requirement of section 78 of the Securities Act 2015, and the relevant requirements of Securities Brokers (Licencing and Operations) Regulations, 2016 as at the date on which the Financial Statements was prepared.

The engagement partner on the audit resulting in this independent auditor's report is Mr. Muhammad Aslam Khan.

AYUB CHAUDHRY INVESTMENTS (PRIVATE) LIMITED NOTES TO THE FINANCIAL STATEMENTS

For the year ended June 30, 2020

1. LEGAL STATUS AND NATURE OF BUSINESS

Ayub Chaudhry Investments (Private) Limited (the "Company") was incorporated in Pakistan on April 24, 2013 as a private limited company, limited by shares, under the Companies Ordinance, 1984 repealed by Company Act 2017. The Company's registered office is situated at Room No. 109, First Floor, North Tower Stock Exchange Building, Khayaban-e-Iqbal, and Labore. The Company is a holder of Trading Rights Entitlement Certificate ("TREC") of Pakistan Stock Exchange Limited. The Company is principally engaged in the business of investment advisory, purchase and sale of securities, financial consultancy, brokerage, underwriting, portfolio management and securities research.

2. BASIS OF PREPARATION

2.1. Statement of compliance

These financial statements have been prepared in accordance with the accounting and reporting standards as applicable in Pakistan. The accounting and reporting standards as applicable in Pakistan comprises of:

- Financial Reporting Standard for Small and Medium Sized Entities (IFRS for SMEs) issued by the International Accounting Standards Board (IASB) as notified under the Companies Act, 2017; and
- Provisions of and directives issued under the Companies Act, 2017, and relevant provisions of the Securities Brokers (Licensing and Operations) Regulations 2016 (the "Regulations").

In case requirements differ, the provisions or directives of the Companies Act, 2017 and/or the Regulations shall prevail.

2.2. Accounting convention

These financial statements have been prepared under the historical cost convention, except:

- Investments in quoted equity securities (whether classified as assets at fair value through profit or loss, or at fair value through other comprehensive income), which are carried at fair value;
- Investments in unquoted equities, measured at fair value through other comprehensive income;
- Investments in associates, which are recorded in accordance with the equity method of accounting for such investments;
 and
- Derivative financial instruments, which is marked-to-market as appropriate under relevant accounting and reporting standards.

2.3. Functional and presentation currency

Items included in these financial statements are measured using the currency of the primary economic environment in which the Company operates. These financial statements are presented in Pak Rupees which is the Company's functional and presentation currency.

2.4. Accounting estimates and judgments

The preparation of financial statements in conformity with approved accounting standards requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are continually evaluated and are based on historical experience as well as expectations of future events and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

Areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the Company's financial statements are as follows:

- (i) Estimates of useful lives and residual values of items of property, plant and equipment (Note 5)
- (ii) Estimates of useful lives of intangible assets (Note 6);
- (iii) Fair values of unquoted equity investments (Note 7);
- (iv) Classification, recognition, measurement / valuation of financial instruments (Note 4.5); and
- (v) Provision for taxation (Note 15)

2.5. New standards, amendments / improvements to existing standards (including interpretations thereof) and forthcoming requirements

2.5.1. Amendments to approved accounting standards and interpretations which became effective during the vest Ende

During the year, certain new accounting and reporting standards/amendments/interpretations became effective and applicable to the Company. However, since such updates) were not considered to be relevant to the Company's financial reporting, the same have not been disclosed here.

2.5.2. New / revised accounting standards, amendments to published accounting standards and interpretations that are not yet effective.

The following International Financial Reporting Standards (IFRS Standards) as notified under the Companies Act, 2017 and the amendments and interpretations thereto will be effective for accounting periods beginning on or after the date specified below;

- Amendment to IFRS 3 'Business Combinations' Definition of a Business (effective for business combinations for which the acquisition date is on or after the beginning of annual period beginning on or after January 01, 2020). The IASB has issued amendments aiming to resolve the difficulties that arise when an entity determines whether it has acquired a business or a group of assets. The amendments clarify that to be considered a business, an acquired set of activities and assets must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create outputs. The amendments include an election to use a concentration test. The application of the amendment is not likely to have an impact on the Company's financial statements.
- Amendments to IAS 1 'Presentation of Financial Statements' and IAS 8 'Accounting Policies, Changes in Accounting Estimates and Errors' (effective for annual periods beginning on or after January 01, 2020). The amendments are intended to make the definition of material in IAS 1 easier to understand and are not intended to alter the underlying concept of materiality in IFRS Standards. In addition, the IASB has also issued guidance on how to make materiality judgments when preparing their general purpose financial statements in accordance with IFRS Standards. The amendments are not likely to affect the financial statements of the Company.
- Interest rate benchmark reform which amended IFRS 9, IAS 39 and IFRS 7 is applicable for annual financial periods beginning on or after January 01, 2020. The G20 asked the Financial Stability Board (FSB) to undertake a fundamental review of major interest rate benchmarks. Following the review, the FSB published a report setting out its recommended reforms of some major interest rate benchmarks such as IBORs. Public authorities in many jurisdictions have since taken steps to implement those recommendations. This has, in turn, led to uncertainty about the long-term viability of some interest rate benchmarks. In these amendments, the term 'interest rate benchmark reform' refers to the market-wide reform of an interest rate benchmark including its replacement with an alternative benchmark rate, such as that resulting from the FSB's recommendations set out in its July 2014 report 'Reforming Major Interest Rate Benchmarks' (the reform). The amendments made provide relief from the potential effects of the uncertainty caused by the reform. A company shall apply the exceptions to all hedging relationships directly affected by interest rate benchmark reform. The amendments are not likely to affect the financial statements of the Company.
- Amendments to IFRS-16- IASB has issued amendments to IFRS 16 (the amendments) to provide practical relief for lessees in accounting for rent concessions. The amendments are effective for periods beginning on or after June 01, 2020, with earlier application permitted. Under the standard's previous requirements, lessees assess whether rent concessions are lease modifications and, if so, apply the specific guidance on accounting for lease modifications. This generally involves remeasuring the lease liability using the revised lease payments and a revised discount rate. In light of the effects of the COVID-19 pandemic, and the fact that many lessees are applying the standard for the first time in their financial statements, the Board has provided an optional practical expedient for lessees. Under the practical expedient, lessees are not required to assess whether eligible rent concessions are lease modifications, and instead are permitted to account for them as if they were not lease modifications. Rent concessions are eligible for the practical expedient if they occur as a direct consequence of the COVID-19 pandemic and if all the following criteria are met:
- a. the change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change;
- b. any reduction in lease payments affects only payments originally due on or before 30 June 2021; and
- there is no substantive change to the other terms and conditions of the lease.

The above amendments are not likely to affect the financial statements of the Company.

1. Classification of liabilities as current or non-current (Amendments to IAS 1) effective for the annual period beginning on or after January 01, 2022. These amendments in the standards have been added to further classification of liability as done current by requiring the assessment of the entity's right at the end of the reporting period to defer the settlement of liability for at least twelve months after the reporting period. An entity shall apply those amendments.

retrospectively in accordance with IAS 8. The amendments are not likely to affect the financial statements of the Company.

- 2. Oncrous Contracts Cost of Fulfilling a Contract (Amendments to IAS 37) effective for the annual period beginning on or after January 01, 2022 amends IAS 1 by mainly adding paragraphs which clarifies what comprise the cost of fulfilling a contract, Cost of fulfilling a contract is relevant when determining whether a contract is onerous. An entity is required to apply the amendments to contracts for which it has not yet fulfilled all its obligations at the beginning of the annual reporting period in which it first applies the amendments (the date of initial application). Restatement of comparative information is not required, instead the amendments require an entity to recognize the cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings or other component of equity, as appropriate, at the date of initial application. The amendments are not likely to affect the financial statements of the Company.
- 3. Property, Plant and Equipment: Proceeds before Intended Use (Amendments to IAS 16) effective for the annual period beginning on or after January 01, 2022 clarifies that sales proceeds and cost of items produced while bringing an item of property, plant and equipment to the location and condition necessary for it to be capable of operating in the manner intended by management e.g. when testing etc., are recognized in profit or loss in accordance with applicable Standards. The entity measures the cost of those items applying the measurement requirements of IAS 2. The standard also removes the requirement of deducting the net sales proceeds from cost of testing. An entity shall apply those amendments retrospectively, but only to items of property, plant and equipment that are brought to the location and condition necessary for them to be capable of operating in the manner intended by management on or after the beginning of the earliest period presented in the financial statements in which the entity first applies the amendments. The entity shall recognize the cumulative effect of initially applying the amendments as an adjustment to the opening balance of retained earnings (or other component of equity, as appropriate) at the beginning of that earliest period presented. The amendments are not likely to affect the financial statements of the Company.

2.5.3. Annual Improvements to IFRS standards 2018-2020:

The following annual improvements to IFRS standards 2018-2020 are effective for annual reporting periods beginning on or after January 01, 2022.

- IFRS 9 The amendment clarifies that an entity includes only fees paid or received between the entity (the borrower) and the lender, including fees paid or received by either the entity or the lender on the other's behalf, when it applies the '10 per cent' test in paragraph B3.3.6 of IFRS 9 in assessing whether to derecognize a financial liability.
- IFRS 16 The amendment partially amends Illustrative Example 13 accompanying IFRS 16 by excluding the illustration of reimbursement of leasehold improvements by the lessor. The objective of the amendment is to resolve any potential confusion that might arise in lease incentives.
- IAS 41 The amendment removes the requirement in paragraph 22 of IAS 41 for entities to exclude taxation cash
 flows when measuring the fair value of a biological asset using a present value technique.

The above amendments are not likely to affect the financial statements of the Company.

3. INITIAL APPLICATION OF IFRS 16

The Company financial statement's has no impact of the International Financial Reporting Standard (IFRS) 16 Leases.

4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Significant accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all years presented.

4.1. Property and Equipment

Items of property and equipment are stated at cost less accumulated depreciation (if any) and impairment losses (if any). Cost includes expenditure that is directly attributable to the acquisition of the items

Subsequent costs are included in the carrying amount as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced part is derecognized. All other repairs and maintenance are charged to the statement of profit or loss account during the year in which they are incurred. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. Where such subsequent costs are incurred to replace parts

and are capitalized, the carrying amount of replaced parts is derecognized. All other repair and maintenance expenditures are charged to profit or loss during the year in which they are incurred.

Depreciation on all items of property and equipment is calculated using the reducing balance method, in accordance with the rates specified in note 5 to these financial statements and after taking into account residual value, if material. Residual values and useful lives are reviewed and adjusted, if appropriate, at each balance sheet date. Depreciation is charged on an asset from when the asset is available for use until the asset is disposed of.

An item of property and equipment is derecognized upon disposal or when no future benefits are expected from its use or disposal. Any gain or loss arising on asset derecognition (calculated as the difference between net disposal proceeds and the carrying amount of the asset) is included in the profit and loss account in the year in which the asset is derecognized.

The assets' residual values, depreciation methods and useful lives are reviewed, and adjusted if appropriate, at each financial year end. The Company's estimate of residual value of property and equipment as at June 30, 2020 did not require any adjustment.

4.2. Intangible assets

Intangible assets with indefinite useful lives, including Trading Right Entitlement Certificate ("TREC"), are stated at cost less accumulated impairment losses, if any. An intangible asset is considered as having an indefinite useful life when, based on an analysis of all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows for the Company. An intangible asset with an indefinite useful life is not amortized. However, it is tested for impairment at each balance sheet date or whenever there is an indication that the asset may be impaired. Gains or losses on disposal of intangible assets, if any, are recognized in the profit and loss account during the year in which the assets are disposed of.

4.2.1. Membership cards and offices

This is stated at cost less impairment, if any. The carrying amount is reviewed at each reporting date to assess whether it is in excess of its recoverable amount, and where the carrying value exceeds estimated recoverable amount, it is written down to its estimated recoverable amount.

4.3. Investment property

Investment properties are held for capital appreciation and are measured initially at its cost, including transaction costs.

Subsequent to initial recognition, investment properties are measured at fair value at each reporting date. The changes in fair value are recognized in the statement of profit or loss.

4.4. Investment in associates

Associates are all entities over which the Company has significant influence but not control. Investments in associates where the Company has significant influence are accounted for using the equity method of accounting. Under the equity method of accounting, investments in associates are initially recognized at cost and the carrying amount of investment is increased or decreased to recognize the Company's share of the associate's post-acquisition profits or losses in income, and its share of the post-acquisition movement in reserves is recognized in other comprehensive income.

4.5. Financial instruments

4.5.1. The Company classifies its financial assets in the following three categories:

Financial assets measured at amortized cost;

b) Financial assets measured at fair value through other comprehensive income (FVOCI); and

Financial assets measured at fair value through profit or loss (FVTPL).

a) Financial assets measured at amortized cost

A financial asset is measured at amortized cost if it is held within business model whose objective is to hold assets to collect contractual cash flows, and its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on principal amount outstanding.

Such financial assets are initially measured at fair value plus transaction costs that are directly attributable to the acquisition or issue thereof.

b) Financial assets at FVOCI

A financial asset is classified as at fair value through other comprehensive income when either:

 It is held within a business model whose objective is achieved by both collecting contractual cash financial assets and its contractual terms give rise on specified dates to cash flows that are solely principal and interest on the principal amount outstanding; or

1. @

ii. It is an investment in equity instrument which is designated as at fair value through other comprehensive income in accordance with the irrevocable election available to the Company at initial recognition. Such financial assets are initially measured at fair value plus transaction costs that are directly attributable to the acquisition or issue thereof.

c) Financial assets at FVTPL

A financial asset shall be measured at fair value through profit or loss unless it is measured at amortized cost or at fair value through other comprehensive income, as aforesaid.

Such financial assets are initially measured at fair value.

4.5.2. Initial recognition

The Company recognizes an investment when and only when it becomes a party to the contractual provisions of the instrument evidencing investment.

Regular way purchase of investments are recognized using settlement date accounting i.e. on the date on which settlement of the purchase transaction takes place. However, the Company follows trade date accounting for its own (the house) investments. Trade date is the date on which the Company commits to purchase or sell its asset.

Transactions of purchase under resale (reverse-repo) of marketable securities including the securities purchased under margin trading system are entered into at contracted rates for specified periods of time. Amounts paid under these agreements in respect of reverse repurchase transactions are recognized as a receivable. The difference between purchase and resale price is treated as income from reverse repurchase transactions in marketable transactions / margin trading system and accrued on a time proportion basis over the life of the reverse repo agreement.

4.5.3. Subsequent measurement

a) Financial assets measured at amortized cost

These assets are subsequently measured at amortized cost (determined using the effective interest method) less accumulated impairment losses.

"Interest / markup income, foreign exchange gains and losses and impairment losses arising from such financial assets are recognized in the profit and loss account.

b) Financial assets at FVOCI

These are subsequently measured at fair value less accumulated impairment losses.

A gain or loss on a financial asset measured at fair value through other comprehensive income is recognized in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses, until the financial asset is derecognized or reclassified. When the financial asset is derecognized the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment (except for investments in equity instruments which are designated as at fair value through other comprehensive income in whose case the cumulative gain or loss previously recognized in other comprehensive income is not so reclassified). Interest is calculated using the effective interest method and is recognized in profit or loss.

c) Financial assets at FVTPL

These assets are subsequently measured at fair value.

Net gains or losses arising from remeasurement of such financial assets as well as any interest income accruing thereon are recognized in profit and loss account.

4.5.4. Impairment

Financial assets

The Company applies a three-stage approach to measure allowance for credit losses, using an expected credit loss approach as required under IFRS 9, for financial assets measured at amortized cost. The Company's expected credit loss impairment model reflects the present value of all cash shortfalls related to default events, either over the following twelve months, or over the expected life of a financial instrument, depending on credit deterioration inception. The allowance / provision for credit losses reflect an unbiased, probability-weighted outcome which considers multiple scenarios based on reasonable and supportable forecasts.

Where there has not been a significant decrease in credit risk since initial recognition of a financial instrument, an amount equal to 12 months expected credit loss is recorded. The expected credit loss is computed using a probability of default occurring over the next 12 months. For those instruments with a remaining maturity of less than 12 months, a probability of default corresponding to the remaining term to maturity is used.

When a financial instrument experiences a significant increase in credit risk subsequent to origination but is not considered to be in default, or when a financial instrument is considered to be in default, expected credit loss is computed based on lifetime expected credit losses.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition, and when estimating expected credit losses, the Company considers reasonable and supportable information that is relevant and available without undue effort or cost. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessments, including forward-looking information.

Forward-looking information includes reasonable and supportable forecasts of future events and economic conditions. These include macro-economic information, which may be reflected through qualitative adjustments or overlays. The estimation and application of forward-looking information may require significant judgment.

Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets. The gross carrying amount of a financial asset is written off when the Company has no reasonable expectation of recovering a financial asset in its entirety or a portion thereof. The Company makes this assessment on an individual asset basis, after consideration of multiple historical and forward-looking factors. Financial assets that are written off may still be subject to enforcement activities in order to comply with the Company's processes and procedures for recovery of amounts due.

Non-financial assets

The carrying amounts of non-financial assets are assessed at each reporting date to ascertain whether there is any indication of impairment. If such an indication exists, the asset's recoverable amount - defined as the higher of the asset's fair value less costs of disposal and the asset's value-in-use (present value of estimated future cash flows using a pre-tax discount rate that reflects current market assessments of the time value of money and asset-specific risk) - is estimated to determine the extent of the impairment loss.

For the purpose of assessing impairment, assets are grouped into cash-generating units: the lowest levels for which there are separately identifiable cash flows.

4.6. Offsetting of financial assets and financial liabilities

Financial assets and liabilities are off-set and the net amount is reported in the statement of financial position if the Company has a legal right to set off the transaction and also intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

4.7. Trade debts and other receivables

Trade debts and other receivables are stated initially at amortized cost using the effective interest rate method.

Provision is made on the basis of lifetime ECLs that result from all possible default events over the expected life of the trade debts and other receivables. Bad debts are written off when considered irrecoverable.

4.8. Cash and cash equivalents

Cash and cash equivalents are carried at cost and include cash in hand, balances with banks in current and desirt accounts, stamps in hand, other short-term highly liquid investments with original maturities of less than three months and short-term running finances.

4.9. Borrowings

Borrowings are recognized initially at fair value, net of attributable transaction costs incurred. Borrowings are subsequently carried at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in the statement of profit or loss account over the period of the borrowings using the effective interest method.

4.10. Trade and other payables

Trade and other payables are recognized initially at fair value plus directly attributable cost, if any, and subsettine measured at amortized cost using the effective interest method. They are classified as current if payment is twelve months of the reporting date, and as non-current otherwise.

4.11. Staff retirement benefits

The Company did not have any retirement benefits plan.

4.12. Taxation

Income tax expense comprises current and deferred tax.

Current

Provision for current taxation is based on taxable income for the year determined in accordance with the prevailing law for taxation of income. The charge for current tax is calculated using rates enacted or substantively enacted at the reporting date, and takes into account tax credits, exemptions and rebates available, if any. The charge for current tax also includes adjustments, where necessary, relating to prior years which arise from assessments framed / finalized during the year.

Deferred

Deferred tax is accounted for using the balance sheet liability method in respect of all temporary differences at the reporting date between the tax base and carrying amount of assets and liabilities for financial reporting purposes

Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized for all deductible temporary differences and carried forward unused tax losses, to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and carried forward unused tax losses can be utilized. Carrying amount of all deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on the tax rates that have been enacted or substantially enacted by the reporting date.

Deferred tax is charged or credited in the statement of profit or loss account, except in the case of items credited or charged to comprehensive income or equity, in which case it is included in comprehensive income or equity.

4.13. Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past event and it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

4.14. Revenue recognition

Revenue is recognized to the extent that it is probable that economic benefits will flow to the Company and the amount of revenue can be measured reliably. Revenue is measured at the fair value of the consideration received or receivable, net of any direct expenses. Revenue is recognized on the following basis:

- Brokerage and commission income is recognized when brokerage services are rendered.
- Dividend income is recognized when the right to receive the dividend is established.
- Return on deposits is recognized using the effective interest method.
- Income on fixed term investments is recognized using the effective interest method.
- Gains / (losses) arising on sale of investments are included in the profit and loss account in the period in which they arise.
- Unrealized capital gains / (losses) arising from marking to market financial assets are included in profit and loss (for assets measured at FVTPL) or OCI (for assets measured at FVOCI) during the period in which they arise.
- Income / profit on exposure deposits is recognized using the effective interest rate.

4.15. Dividend income

Dividends received from investments measured at fair value through profit or loss and at fair value through other comprehensive income. Dividends are recognized in the statement of profit or loss when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the Company and the amount of the dividend can be measured reliably. This applies even if they are paid out of pre-acquisition profits, unless the dividend clearly represents a recovery of a part of the cost of an investment. In this case, dividend is recognized in other comprehensive income if it relates to an investment measured at fair value through other comprehensive income.

4.16. Mark up / interest income

Mark-up / interest income is recognized on a time proportion basis on the principal amount outstanding and at the rate applicable.

4.17. Borrowings

These are recorded at the proceeds received. Finance costs are accounted for on accrual basis and are disclosed as accrued interest / mark-up to the extent of the amount unpaid at the reporting date.

4.18. Borrowing costs

Borrowing costs are recognized as an expense in the period in which these are incurred except to the extent of borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset. Such borrowing costs, if any, are capitalized as part of the cost of the relevant asset.

4.19. Fiduciary assets

Assets held in trust or in a fiduciary capacity by the Company are not treated as assets of the Company.

4.20. Foreign currency transactions and translation

Monetary assets and liabilities in foreign currencies are translated into functional currency at the rates of exchange prevailing at the balance sheet date. Transactions in foreign currencies are translated into functional currency at the rates of exchange prevailing on the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in income.

4.21. Derivative financial instruments

Derivative financial instruments are recognized at their fair value on the date on which a derivative contract is entered into. Subsequently, any changes in fair values arising on marking to market of these instruments are taken to the profit and loss account.

4.22. Related party transactions

All transactions involving related parties arising in the normal course of business are conducted and recorded at rates that are not less than market.

	7,500,000	7,500,000
	7,500,000	7,500,000

Pursuant in the Stock Exchange (Corporatization, Dumanalization and Integration) Act, 2012, stock exchanges operating as guarantee limited componius 6.1 were converted to public limited companies. Ownership rights in exchanges were eggregated from the right to trade on an exchange. As a result of such demutualisation and corporatization, the Company received shares of the relevant exchange and a Teading Rights Einstellment Cornficate ("TREC") against its mombership card.

The TREC has been recorded as an indefinite-life intangible asset pursuant to the provisions and requirements of IAS 38. As the TREC is not a commonly tradiable instrument, the value approved by the Board of Directors of the Pakistan Stock Exchange Limited (*PSX*) post-minutelization was used as the initial value of the intangible. The TREC, which has been pledged with the PSS to meet flase Minimum Capital ("BMC") requirements, in assessed for impainment in accordance with relevant approved accounting standards.

6.2 This represents the value of the long-term lease of one coom located or the labore Stock Exchange building. This amount has been re-classified from Long-term Deposits (Note 9) given that the Company now has possession of the room. Given the long duration of the lease term and the fact that it carnot be reliably estimated whether additional amounts will be due upon lease expiry in order to renew the leases, the morn rights six trested as in intangible asset with an indefinite useful life.

24. EARNINGS PER SHARE

22

23

Basic earnings per share a calculated by dividing profit after tax for the year by the weighood average number of shares occuranding during the period, as follows:

Profit / (loss) after taxation, attributable to ordinary shareholders.
Weighted overage number of ordinary shares in issue during the year framings per share.

2020	2019
Rupees	Rupees
4,951,449	(9,122,621)
350,000	350,000
14.15	(26.06)

No figure for diluted carnings per share has been presented as the Company has not issued any dilutive instruments carrying options which would have an impact on earnings per share when exercised.

25. REMUNERATION OF CHIEF EXECUTIVE, DIRECTORS AND EXECUTIVES

The aggregate amounts charged in the financial statements for retrumention, including henefits, to the chief executive, directors and executives of the Company is per the terms of their employment are as follows:

27 FINANCIAL RISK MANAGEMENT

27.1 Risk management framework

The Director / Chief Executive has overall responsibility for the establishment and oversight of the Company's risk management francework. He is also responsible for developing and monitoring the Company's risk management policies, which are monitored and assessed for effectiveness throughout the year. The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and to establish internal control over risk. Through its training and management standards and procedures, the Company aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company's activities are exposed to a variety of financial risks, market risk, credit risk and liquidity risk. The Company has established adequate procedures to manage each of these risks as explained below.

27.2 Market risk

Market risk is the risk that the value of financial instruments may fluctuate as a result of changes in market interest rates, changes in the credit rating of the issuer of the instruments, change in market sentiments, speculative activities, supply and demand of securities and/or changes in liquidity in the market.

Market risk comprises of three types of risk: currency risk, interest rate risk and other price risk

29.2.1 Currency risk

Currency risk mainly arises where receivables and payables exist due to transactions with foreign undertakings. The Company is not exposed to major foreign exchange risk in this respect.

29.2.2 Interest rate risk

Yield risk is the risk of decline in earnings due to adverse movements of the yield curve. Interest rate risk is the risk that the value of the financial instruments will fluctuate due to changes in market interest rates. Sensitivity to interest / mark-up rate risk arises from mismatches or gaps in the amounts of interest / mark-up based assets and liabilities that mature or reprice in a given period. The Company manages this risk by matching the maturity / repricing of financial assets and liabilities through appropriate policies.

29.2.3 Price risk

Price risk is the risk that the fair value of financial instruments will fluctuate as a result of changes in market prices, whether such changes are due to factors specific to individual financial instruments (including factors specific to issuers of such instruments) or due to macroeconomic or other factor affecting similar financial instruments being traded in the market.

The Company is exposed to price risk in respect of investments carried at fair value (whether is available-for-sale investments or as instruments at fair value through profit or loss). Such price risk comprises both the risk that price of individual equity investments will fluctuate and the risk that there will be an index-wide movement in prices. Measures taken by the Company to monitor, manage and mitigate price risk include daily monitoring of movements in stock indexes (such as the KSE 100 index) as well as of the correlation between the Company's investment portfolio with stock indexes.

27.3 Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Concentration of credit risk arises when a number of counterparties are engaged in similar business activities or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political, or other conditions. Concentrations of credit risk indicate the relative sensitivity of the Company's performance to developments affecting a particular industry.

Credit risk of the Company arises from deposits with banks and financial institutions, trade debts, loans and advances, investments and other receivables. The carrying amount of financial assets represents the maximum credit exposure, although this maximum is a theoretical formulation as the Company frequency holds collateral against potential credit losses.

Measures taken by management to manage and mitigate credit risk include:

- Development of and compliance with risk management, investment and operational policies / guidelines (including guidelines in respect of entering into financial contracts);
- Assignment of trading limits to clients in accordance with their net worth;
- Collection / maintenance of sufficient and proper margins from clients,
- Initial and ongoing client due diligence procedures, where elsents' financial position, past experience and other factors are considered,
- Collection and maintenance of collateral if, as and when deemed necessary and appropriate;

- Diversification of client and investments portfolios; and
- Engagement with creditworthy / high credit rating parties such as bunks, clearing houses and stock exchanges

The Company continually monitors the quality of its debtor portfolio, both on an individual and portfolio basis, and provides against credit losses after considering the age of receivables, nature / quantum of collateral and debtor-specific factors (such as creditworthiness and repayment capacity).

The carrying amount of financial assets, which represents the maximum credit exposure before consideration of collateral and counterparty creditworthiness, is as specified below:

	2020	2019
Long-term investments	19,605,539	19,158,233
Soort-term investments	22,946,479	20,812,160
Long-term deposits	375,000	582,500
Trade deposits, short term prepayments and other receivables	3,789,217	2,721,712
Trade debts (net)	391,669	706,761
Cash and Bank balances	31,549,539	17,288,859
	78,657,443	61,070,225

27.4 Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations, settled by delivering cash or another financial asset, as they fall due. Prudent liquidity risk management requires the maintenance of sufficient cash and marketable securities, the availability of adequate funds through committed credit facilities and the ability to close out market positions due to the dynamic nature of the business and the industry it operates in. The Company finances its operations through equity and, as and when necessary, borrowings, with a view to maintaining an appropriate mix between various sources of financing.

The table below classifies the Company's financial liabilities into relevant maturity groupings based on the time to contractual maturity date, as at the balance sheet date. The amounts in the table are contractual undiscounted each flows.

		As at June 3	10, 2020
Financial liabilities	2 m	Within one	1000
	Carrying amount	year	More than one year
Trade and other payables	21,612,219	21,612,219	
Total	21,612,219	21,612,219	
		As at June 3	10, 2019
Financial habilities	-	Within one	
	Carrying amount	year	More than one year
Trade and other payables	10,240,156	10,240,156	
Total	10,240,156	10,240,156	- 13

The Company does not expect that the timing or quantum of cash flows outlined in the table above will change significantly, and as a result expects to be able to fulfill its obligations as they come due.

28 CAPITAL RISK MANAGEMENT

The Company's objective in managing capital is to ensure that the Company is able to continue as a going concern so that it can continue to provide adequate returns to shareholders and benefits to other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital. As well, the Company has to comply with capital requirements as specified under the Securities Brokers (Licensing and Operations) Regulations, 2016 (as well as other relevant directives from regulating bodies issued from time to time).

Consistent with industry practice, the Company manages its capital risk by monitoring its debt levels and liquid assets, keeping in view future investment requirements.

29 FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

Fair value is the amount that would be received on the sale of an asset or paid on transfer of a liability in an orderly transaction between marker participants at the measurement date. Consequently, differences can arise between carrying values and fair value estimates. Underlying the definition of fair value is the presumption that the Company is a going concern without any intention or requirement to materially curtail the scale of its operations or to undertake a transaction on adverse terms.

Various judgments and estimates are made in determining the fair value of financial instruments that are recognized and measured at fair value in the Company's financial statements. To provide an indication about the reliability of inputs used in determining fair value, financial instruments

have been classified into three levels, as prescribed under accounting standards. An explanation of each level follows the table.

Recurring FV Measurement - June 30, 2020	Level I	Level II	Level III	Total
Long-term investment - at FVOCI Short-term investments - at FVTPL	22,946,479	19,605,539	5	19,605,539 22,946,479
Recurring FV Measurement as at June 30, 2019	Level I	Level II	Level III	Total
Long-term investment - at FVOCI Short-term investments - at FVTPL	20,812,160	19,158,233	ě	19,158,233 20,812,160

In the fair value hierarchy in the preceding table, inputs and valuation techniques are as follows:

- Level 1: Quoted market price (unadjusted) in an active market

- Level 2: Valuation techniques based on observable inputs

· Level J: Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data.

There were no transfers into or out of Level 1 measurements.

CAPITAL MANAGEMENT

The Company objectives when managing capital are to safeguard the company's ability as a going concern I order to provide returns 30.1 for shareholders and benefits for other stakeholders and to maintain an optimal capital structure.

30.2	CAPITAL ADEQUACY The Capital Adacquacy level as required by CDC is Calculated as Follows	Notes	(Rapees)
	Total Anni Leix, Total Liabilities Leix, Revalentian Reverses (anated upon revaluation of fixed assets)	10.2.1	87,697,313 (21,612,219)
	Capital Adequacy Level	<u> </u>	66,085,095

30.2.1 While determining the value of the total assets of the TREC Holder, Notional value of TREC as at year ended as determined by Pakistan Stock Exchange has been considered.

30.3 NET CAPITAL BALANCE

Net capital requirements of the Company are set and regulated by Pakistan Stock Exchange Lamited. These requirements are put in place to ensure sufficient solvency margins and are based on excess of current assets over current liabilities.

The Net Capital Balance as required under Third Schedule of Securities and Exchange Rules, 1971 read with the SECP guidelines is calculated as follows

Α.	Description of Current Assets	Basis of Accounting	Notes	Amount (Rupees)
E	Cash in hand & Cash in bank Cash in hand Cash at bank-House Account Cash at bank-Client Account	As per book value:	10	12,068 12,841,584 18,695,886 31,549,539

35 IMPACT OF COVID-19 (CORONAVIRUS)

The pandemic of COVID-19 that has rapidly spread all across the world has not only endangered human lives but has also adversely impacted the global economy. On March 23, 2020, the Government of the Punjab announced a temporary lock down as a measure to reduce the spread of the COVID-19. The Company's operations were not affected as Pakistan Stock Exchange was not subject to lockdown restrictions. Company implemented all the necessary Standard Operating Procedures (SOPs) to ensure safety of employees and contained its operations. Due to this, management has assessed the accounting implications of these developments on these financial statements, however, according to management's assessment, there is no significant accounting impact of the effect of COVID-
